THE BOSTON COLLEGE HIGH SCHOOL

1902—1903

BOSTON, MASS.

PUBLISHED FOR THE BOSTON COLLEGE
HIGH SCHOOL

1902-1903

A. M. D. G.

The Boston College High School.

This institution is under the administration of "THE TRUSTEES OF THE BOSTON COLLEGE IN BOSTON."

Under the act of incorporation schools were opened September 5, 1864.

The same act of incorporation provides "that no student of said College shall be refused admission to, or denied any of the privileges, honors, or degrees of said College on account of the religious opinions he may entertain." Students who are not Catholics will not be required to participate in any distinctively Catholic exercise, nor will any undue influence be exerted to induce a change of religious belief, but evidence will be demanded of the candidate to prove good moral character.

System of Education.

The educational system of BOSTON COLLEGE is substantially that of all other colleges of the Society of Jesus. Those who are desirous of making either a scientific or historical study of that system, have abundant sources of information in the following works: *Monumenta Germaniæ Pedagogica*, Vols. II., V., IX., XVI. *Un Collège de Jesuites*, par C. De Rochemonteix, S. J., and for a shorter, but complete, commentary on the *Ratio Studiorum*, the reader is referred to, "Jesuit Education," by Robert Schwickerath, S. J., (*Herder*, St. Louis, 1903).

The subjoined brief outline of the underlying principles of the system, the dominant features of its method, and the object aimed at by its teaching will give a general idea of its purpose.

Education is understood by the Fathers of the Society in its completest sense, as the full and harmonious development of all those faculties that are distinctive of man. It is not, therefore, mere instruction or the communication of knowledge. In fact, the acquisition of knowledge, though it necessarily accompanies any right system of education, is a secondary result of education. Learning is an instrument of education, not its end. The end is culture, and mental and moral development.

Understanding, then, clearly the purposes of education, such instruments of education, that is, such studies, sciences or languages, are chosen as will most effectively further that end. These studies are chosen, moreover, only in proportion, and in such numbers as are sufficient and required. A student who is to be educated will not be forced, in the short period of his college course and with his immature faculties, to study a multiplicity of the languages and

sciences into which the vast world of modern knowledge has been scientifically divided. If two or more sciences, for instance, give similar training to some mental faculty, that one is chosen which combines the most effective training with the largest and most fundamental knowledge.

The purpose of the mental training given is not proximately to fit the student for some special employment or profession, but to give him such a general, vigorous and rounded development as will enable him to cope successfully even with the unforeseen emergencies of life. While giving the mind stay, it tends to remove the insularity of thought and want of mental elasticity, which is one of the most hopeless and disheartening results of specialism in students who have not brought to their studies the uniform mental training given by a systematic college course. The studies, therefore, are so graded and classified as to be adapted to the mental growth of the student and the scientific unfolding of knowledge; they are so chosen and communicated that the student shall gradually and harmoniously reach, as nearly as may be, that measure of culture of which he is capable.

It is fundamental in the system of the Society of Jesus that different studies have distinct and peculiar educational values. Mathematics, the Natural Sciences, Language and History are complementary instruments of education to which the doctrine of equivalence cannot be applied. The specific training given by one cannot be supplied by another.

Furthermore, Language and History have always been held in esteem as leading factors in education. Mathematics and the Natural Sciences bring the student into contact with the material aspects of nature, and exercise the inductive and deductive powers of reason. Language and History effect a higher union; they are manifestations of spirit to spirit, and by their study and for their acquirement the whole mind of man is brought into widest and subtlest play. The acquisition of Language especially calls for

delicacy of judgment and fineness of perception, and for a constant, keen, and quick use of the reasoning powers. A special importance is attached to the classic tongues of Rome and Greece. As these are languages with a structure and idiom remote from the language of the student, the study of them lays bare before him the laws of thought and logic, and requires attention, reflection and analysis of the fundamental relations between thought and grammar. In studying them the student is led to the fundamental recesses of language. They exercise him in exactness of conception in grasping the foreign thought, and in delicacy of expression in clothing that thought in the dissimilar garb of the mother-tongue. While recognizing, then, in education the necessity and importance of Mathematics and the Natural Sciences, which unfold the inter-dependence and laws of the world of time and space, the Jesuit system of education has unwaveringly kept Language in a position of honor as an instrument of culture.

Lastly, the system does not share the illusion of those who seem to imagine that education, understood as an enriching and stimulating of the intellectual faculties, has a morally elevating influence in human life. While conceding the effects of education in energizing and refining imagination, taste, understanding and powers of observation, it has always held that knowledge and intellectual development of themselves have no moral efficacy. Religion only can purify the heart, and guide and strengthen the will.

The Jesuit system of education, then, aims at developing, side by side, the moral and intellectual faculties of the student, and sending forth to the world men of sound judgment, of acute and rounded intellect, of upright and manly conscience. And since men are not made better citizens by the mere accumulation of knowledge, without a guiding and controlling force, the principal faculties to be developed are the moral faculties. Moreover, morality is to be taught continuously; it must be the underlying base, the vital force supporting and animating the whole organic

structure of education. It must be the atmosphere the student breathes; it must suffuse with its light all that he reads, illumining what is noble and exposing what is base, giving to the true and false their relative light and shade.

In a word, the purpose of Jesuit teaching is to lay a solid sub-structure in the whole mind and character for any superstructure of science, professional and special, also for the building up of moral life, civil and religious.

Studies.

It is one of the decided advantages of the system followed in this College, that the student may begin his studies in the High School, and then pass on, through the college course, to graduation, in the same institution. This secures, besides the moral influence thus gained, a uniform and homogeneous course of teaching and of training. The result of such a course of study is a continuous and normal development of the mental faculties along well defined lines, and the possession of a clear and coherent system of principles upon which any special courses may afterward safely rest.

The course of Studies is graduated as follows:

At the beginning of the High School Course attention is given chiefly to the acquiring of an accurate knowledge of English and of Elementary Mathematics, together with such general school work as is commonly assigned to young boys at this stage of their education. This part of the course includes, also, the first elements of Latin; thus, at the very start, it is possible to begin a comparative study of grammar. The continued use of oral and written exercises makes the teaching accurate and eminently practical.

In the second term of the first year the study of Greek is begun, and in the second year French and German is taken up.

Though it is not deemed advisable to give up, in any part of the course, the training of the memory, yet this exercise yields gradually, as the student proceeds, to the more important exercise of

the judgment, to the development of literary taste, and to the exercise of the critical powers.

At his entrance into the College Course, after the four years of preparatory training, the student is expected to be reasonably familiar with Latin, Greek, French or German, to have a practical knowledge of the grammars and idioms of these languages, and to have acquired a knowledge and command of the elementary principles of English composition. He is then prepared to enter upon his literary work, and to study intelligently and profitably the best models of ancient and modern literature. He has, moreover, laid the foundations of higher studies in Mathematics by a thorough training in Arithmetic, Elementary Algebra and Geometry.

Religious Training.

The moral and religious part of education is considered to be incomparably the most important. Catholic students, if not excused for good reasons, are required to recite the daily catechetical lesson, to attend the weekly lectures on the doctrines of the Church, to make an annual retreat, to present themselves to their confessor every month, and, if they have not received the Sacraments of Penance, Confirmation or Holy Eucharist, to prepare for their reception.

Literary Facilities.

There are various Societies in which, under the moderatorship of College officers, the work of the class-room is supplemented, or special fields of study are cultivated.

A choice collection of books, numbering about four thousand, affords the student ample means, both for preparation of lessons and themes, and for reading in connection with his studies.

Class Standing.

For each memory lesson, according to its excellence, the scholar receives a mark, grading from ten down; for translation, from

twenty; and for themes or composition, from thirty; as the labor of preparation of the various exercises, and their relative importance, are considered to be to each other as one, two and three.

A report of each student's class standing is sent to parents or guardians during the first week of each month and at the end of each term. This report — except the one that is sent at the end of the year — is, after inspection, to be signed by the parents or guardians and returned to the Prefect of Studies.

On the scale used, 100 is the highest mark and 0 the lowest. The student's rank is determined by his position in one of five grades: A, very good, 100-90; B, good, 90-80; C, fairly good 80-70; D, 70-60; E, below 60, deficient.

In the second term or session the same method is followed, and the year's results are seen in the average obtained from the combination of those of the two terms. According to this average of results for the year, class honors and promotions are determined. The medal and premium are conferred on the first two students who have reached the highest annual average above 93; "honorable mention," on those above 85. An average of 60 is required for promotion. To prevent exclusive devotion to one pursuit it has been found necessary for culpable failure in Mathematics, Modern Languages or Natural Sciences to refuse promotion in the main class. Hence students whose grand average for the year is above 60, but who have fallen below 60 in some studies, will be "conditioned" in those studies, and will not be promoted until the condition is removed by a satisfactory examination.

Parents and guardians should observe that absence and tardiness, even when excusable, affect class standing.

No student will be promoted from any class till his progress justifies advancement.

Admission.

Boston College is for day scholars.

No student will be admitted who does not reside with his parents

or immediate relatives, or, if this is impossible, with persons duly approved by the President of the College. Those who come from other institutions must show certificates of honorable dismissal.

Applicants for admission to the High School must be graduates either of the Boston Grammar or Parochial Schools, and these will be admitted without examination upon presentation of their certificate of graduation.

Others who are not graduates of said schools will be admitted only after passing a satisfactory examination in the matters seen in the course of the Boston Grammar Schools.

On account of age or peculiar circumstances, exemption from certain studies is sometimes conceded, in which case the scholar is placed "out of course," and is not reckoned a candidate for honors or prizes.

Terms.

The charge for tuition is thirty dollars per session of five months. The bill for the first term will be presented on or before October 1st, and is to be paid before November 1st; the bill for the second term will be presented on or before March 1st, and is to be paid before April 1st.

General Regulations.

The students will be admitted to the gymnasium at 8.20; to the class-room at 8.50.

All students must be in their respective class-rooms at 9 o'clock; those who come later must apply for an admission ticket to the Prefect of Discipline.

No student of the High School will be allowed to leave the College premises at the noon recess without permission of the Prefect of Discipline.

Exemption from any of the classes or other exercises of the School must be obtained by parents or guardians. In no case will the matter be treated of with the students themselves. *In case of*

absence or tardiness a note of excuse from parents or guardians will be exacted.

Any conduct unbecoming the character of a gentleman will be regarded as a violation of the School rules.

Religious motives being habitually appealed to, little need has been experienced of frequent or severe punishment.

Flagrant offences, such as are detrimental to the reputation of the School, or are obstructive of the good of other students, are grounds for suspension or for conditional or absolute expulsion.

For faults of ordinary occurrence, such as tardy arrival, failure in recitations, or minor instances of misconduct, detention after school or the task of copying or committing to memory some lines of an author is usually found to be sufficient penalty.

Parental Co-operation.

The efforts of teachers and prefects will be much facilitated if the co-operation of parents can be secured.

Parents are, therefore, earnestly requested :

1st. To insist upon daily study at home for two or three hours.

2d. To notify the Prefect speedily in case of the withdrawal of their sons, or of necessary detention from, or tardy arrival at, school ; of failure to receive the monthly report.

3d. To attend to notifications — always sent by the Prefect in the case of an unexplained absence, or for lessons notably bad during a considerable length of time.

4th. To require and examine the monthly report, and not to omit inquiry regarding marks which fall below 70.

Daily Order.

The usual hours for school are from 9 A. M. to 2.30 P. M., with short recesses at convenient intervals.

Special arrangements will be necessary in each individual case

to excuse late arrival. In every case the reasons for exemption are to be presented by parents or guardians.

During the progress of the examinations the time for closing will be somewhat anticipated.

Sessions and Holidays.

The first session begins on the second Tuesday of September; the second, the first Tuesday of February; but students are not precluded from entering at other times.

The following are ordinary holidays: —

Every Saturday.

The days of a session remaining after the close of an examination.

All the holydays of obligation.

From December 23 to January 3.

From Wednesday in Holy Week to Wednesday in Easter Week.

The feasts of St. Patrick and St. Aloysius.

Thanksgiving Day, Washington's Birthday, Patriots' Day, Memorial Day, Bunker Hill Day.

Expenses for each of the Two Terms.

Tuition, \$30.00.

Fee for Library and Athletics, \$1.50.

Scholarships.

The regularly founded Scholarships are :—

Twenty Scholarships at the disposal of ST. MARY'S CHURCH at the North End. The Scholarships were given by the College in 1864, in recognition of generous contributions made by the parishioners of St. Mary's to the building of the College Church of the Immaculate Conception. The pastor of St. Mary's selects the candidates from among the pupils of the parish school, in which the Scholarships are won by competition.

Two Scholarships founded by REV. WILLIAM ORR, of Cambridge. The Reverend founder has the privilege of selecting the candidates for these Scholarships in conjunction with the President of the College.

The ROSE FITZPATRICK SCHOLARSHIP, founded in 1894, by a bequest of the lady whose name it bears.

The FATHER CHARLIER SCHOLARSHIP, founded in 1894, by the Immaculate Conception Conference of St. Vincent de Paul Society, to commemorate the semi-centenary in Religion of their Spiritual Director.

The HENRY DOHERTY SCHOLARSHIP, founded in 1895, by the late Henry Doherty.

The FLATLEY SCHOLARSHIP, founded in 1896, by the late Rev. Michael F. Flatley, of Malden, in favor of some deserving student of the parochial school of the Church of the Immaculate Conception, Malden.

The DOLAN SCHOLARSHIPS, one founded in 1896, another in 1898, and a third in 1903, by Rev. Michael Dolan of Newton. The beneficiary is to be a graduate of the Grammar or High School of

the Parish of Our Lady at Newton. In case no such student applies, another may be sent by the pastor of said church or the Archbishop of Boston, provided he is fit to begin the course at the College or High School.

The JOHN F. CRONAN SCHOLARSHIP, founded August, 1897, by John F. Cronan, Esq., of Boston. This foundation is in favor of any deserving young man who is without means of securing an education. This Scholarship shall be open to competition. All examinations for the same shall be held after due notice is given in at least two newspapers. The holder of this Scholarship is entitled to all the privileges of the four years' course in Boston College. In the event of no one applying to compete for the Scholarship, there is reserved the right of selection by His Grace the Archbishop of Boston.

The HANNAH MCCARTHY SCHOLARSHIP, founded in 1898, by a bequest of the lady whose name it bears.

The JAMES E. HAYES SCHOLARSHIP, founded in June, 1900, by the State Council, Knights of Columbus.

Three Scholarships, known as The Loyola Scholarships, founded by the late Rev. Thomas Scully, of Cambridgeport, Mass.

A Scholarship founded by the late Joseph Sinnott, of Philadelphia.

Four Scholarships, founded by the late Mrs. Anna H. Ward.

A Scholarship founded by the late Miss Ruth Charlotte Dana.

Two Scholarships, founded by the late Miss Cecilia Tully.

A Scholarship founded by the late Rev. John Flatley, of Cambridge, Mass.

A Scholarship founded by Mrs. John Sullivan in memory of her husband.

A Scholarship founded by the late Mrs. Mary Kramer.

A Scholarship for eight years, founded by Joseph Lynch Early, '01.

Three of these Scholarships are open this year for competition,

each entitles the winner to free tuition in the High School for the four years' course, from September, 1903.

Besides these Scholarships, the generous efforts of friends of the College have enabled the faculty to establish twenty-three more, which may be called the Boston College Scholarships. These will be offered for competition whenever they are vacant. Due notice of the dates and conditions of competition will be given in the yearly catalogue of the College.

The sum of \$1,500 will furnish a Scholarship which will ensure the tuition of a student, but it will require the interest of \$2,000 to enable the student, besides, to purchase his text-books and to meet other contingent expenses of the course.

Societies of the Students.

THE SODALITY OF THE HOLY ANGELS.

Was organized in the year 1875-76 for the younger students.

OFFICERS : — *Director*, Michael Jessup, S. J.

FIRST TERM : — *Prefect*, Francis E. Kelly ; *First Assistant*, Louis J. Gallagher ; *Second Assistant*, James H. Dolan ; *Secretary*, Robert S. McMorrow ; *First Consultor*, Michael J. O'Keefe ; *Second Consultor*, Louis A. White.

SECOND TERM : — *Prefect*, Francis L. Reilly ; *First Assistant*, Patrick J. Mahoney ; *Second Assistant*, William Carleton ; *Secretary*, Robert S. McMorrow ; *First Consultor*, John F. Greaney ; *Second Consultor*, Louis A. White.

Fifty members.

THE BAPST DEBATING SOCIETY.

(Organized in February, 1895.)

MODERATOR : — Thomas F. Graham, S. J.

FIRST TERM : — *President*, John F. Duston ; *Vice-President*, John F. Dooley ; *Secretary*, Joseph R. Gillan ; *Treasurer*, Patrick Mahoney ; *First Censor*, Joseph D. Pastorelli ; *Second Censor*, Joseph T. Lowry.

SECOND TERM : — *President*, Joseph D. Pastorelli ; *Vice-President*, Patrick Mahoney ; *Secretary*, Eugene P. Crayne ; *Treasurer*, Louis J. Gallagher ; *First Censor*, Joseph R. Gillan ; *Second Censor*, Edward J. Hurley.

The number of members is limited to fifty.

The annual prize debate took place in Boston College Hall on Tuesday evening, June 23, 1903. The question debated was, *Resolved*: "That territorial expansion is opposed to the best interests of the country." The debaters were: Affirmative — John F. Dooley, F. Joseph Sullivan. Negative — Edward J. Hurley, Patrick J. Mahoney; Chairman, Daniel C. Carey, '03, President of the Fulton Debating Society. The following gentlemen were judges of the debate: Augustine L. Rafter, A. M., '82; Rev. John T. Stinson, A. B., '95; William D. Nugent, A. B., '99. At the close of the debate the gold medal was awarded to Edward J. Hurley.

DIRECTOR, First Term, Rev. William S. Singleton, S. J.; Second Term, Mr. Michael J. Ahern, S. J.

PROMOTERS: — *First Academic*, Edward J. Hurley, John F. Duston; *Second Academic*, Joseph T. Lowry, Daniel Kelleher; *Third Academic*, John S. Kelly, Patrick C. H. Thornton, Francis T. Keville; *Fourth Academic*, Louis A. White, Louis M. Fernekees, Daniel H. Sullivan.

STUDENTS' LIBRARY.

The Students' Library consists of a collection of four thousand volumes, especially adapted to the consultation and home use of the student. The large and elegantly-appointed room is open to them from 8.30 to 9 A. M., 1 to 1.30 and 2.30 to 3 P. M. on school days. Librarian, Redmond J. Walsh, S. J.; Assistant Librarians, John A. Mattimore, Patrick J. Mahoney, John S. Kelly. Grateful acknowledgment is made of gifts received from the Rev. John D. Tierney, Manuel de Moreira, A. M., Francis X. Vincent, Esq., Maurice Ahern, Andrew J. O'Brien, '06; Robert E. Lee, '06.

Course of Studies.

The number of hours given below indicates the amount of time per week for each study.

French and German are alternatives.

The subjoined schedule of studies has been defined for the regular classical course in preparation for college. This classical course, even though the student does not intend later to enter college, is in itself excellent, because it affords the best means for training the mind. Certain conditions, however, sometimes suggest that a student omit the study of the classical languages. For this reason there is the English course in the Boston College High School.
